

TAB-1601

Smart Parking Barrier Gate

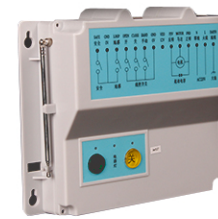

The Model TAB-1601 is for high-use single-lane vehicle traffic control. Typical applications include commercial, industrial, community security and apartment complexes. The fast 1.2 second rotation opening time, together with its rugged construction and multiple features make the TAB-1601 the versatile answer to many parking control problems. The TAB-1601 is available in orange-red top powder coating quality. This operator is designed in such a way that it can be installed on the left or right side of the road.
